ACM Rehabilitation Case Management Expert Witness

Andie Minor

BA (Hons) Social Work
Case Manager

Specialisms:

- Spinal cord injury including autonomic dysreflexia
- Acquired brain injury
- Traumatic brain injury
- Complex orthopaedic injuries
- Complex mental health conditions inc. PTSD
- Amputations
- Cerebral palsy
- Complex regional pain syndrome

Case Studies:

Andie supported a client with a significant brain injury. On meeting he was housebound, anxious, depressed and socially isolated. Within 12 months and the support of a multi-disciplinary team he has a new lease on life, is attending the gym, discovered interests in sports such as pickle ball, is volunteering for a local charity and returned to riding his bike cycling up to 15km in a day.

Andie has supported a client with cerebral palsy, learning difficulties and autism. After developing a close working relationship with the support team, they have managed to successfully support the client to live independently at home, addressing significant health issues and matters relating to online safety as they arose.

Biography:

Andie has over 17 years' experience of working with clients with a wide range of complex physical and mental health needs. Andie strives to promote a client's quality of life and maximise their potential. She advocates for her clients and considers all aspects of their life, enabling and promoting opportunities and inclusion. She has a proven ability to develop a good rapport with clients and their families.

She has acquired her experience as a case manager over the last 5 years and before moving into case management she was a Senior Specialist Social Worker in complex trauma at DMRC Healey Court & Stanford Hall. Here she worked with miltary patients with complex physical and psychological trauma. Working as part of a multi-disciplinary team supporting patients with their rehabilitation back to maximal possible health and/or operational fitness.

Andie has also worked in the NHS as part of the discharge planning team at Addenbrookes Hospital, Cambridge. She completed social care assessments, submitted cases to the local authority panel for funding agreement, conducted mental capacity assessment and regularly undertook assessments and participated in decision support tool meetings for CHC funding.

Andie's current case management work inlcudes, assessing the need for case management, care and rehabilitation by completing immediate needs assessments and ongoing update reports for her clients, ensuring there are adequate risk assessments and management strategies in place where these are required, designing and developing rehabilitation packages and monitoring the multi-disciplinary input, coordinating services from the statutory and independent sections and where required recruiting, training and managing support workers.

Andie's blend of skills, knowledge, and experience positions her a highly credible asset in the field of case management.

Hobbies and Interests

Andie enjoys spending time with her family especially her two grandchildren. She loves musical theatre and is hoping to take up Macrame as a hobby.

Her dream is to swim with turtles .
