CATH SAYS:

“Empathy with families can improve relationships, foster understanding, and promote positive interactions in Case Management. It plays a crucial role in creating more compassionate and effective relationships in my work.”

BIOGRAPHY

Cath is an HCPC Registered Occupational Therapist and experienced occupational therapist with over two decades of work in variety of settings. Her expertise covers a wide range of age groups and conditions, and she has a particular focus on assessment, adaptations, and securing statutory funding. Her experience extends to working with children and young people requiring end-of-life care, demonstrating her dedication and compassion.

In her role as a case manager for WCM, Cath brings her wealth of experience to support individuals and their families. She also works independently, providing assessments and interventions for both adults and children with diverse physical, complex medical, and sensory needs.

Cath's specialisation lies in paediatric occupational therapy, where she possesses advanced knowledge of the functional and medical requirements of children and young adults with complex and life-limiting conditions. She has a comprehensive understanding of the effectiveness of equipment and adaptations, as well as how caring for individuals with complex needs impacts the entire family.

Her expertise extends to assessing and treating children with neurological conditions, cerebral palsy, and sensory difficulties. She enjoys both working independently and as part of a team, and she has gained experience collaborating with various types of organisations, including statutory, private, and third sector entities.

Cath's role involves identifying functional and caring challenges for children and their families, prioritising interventions, and offering strategies to support skill development or necessary adaptations for successful engagement in activities. Her empathetic and friendly approach enhances the quality of care she provides to her clients and their families.
