DORA SAYS:

"By prioritising a person-centred and solution-focused approach, this ensures that the client's needs and preferences are at the forefront, while striving for practical and effective solutions. Having a team of highly experienced office staff also contributes to the quality of case management services. This ensures that the client's needs and preferences are at the forefront, while striving for practical and effective solutions."

BIOGRAPHY

Dora's is an HCPC Registered Occupational Therapist and experience case manager. She works with both adults and children in settled and unsettled cases across a range of complex disabilities. Her expertise lies in neurological community assessment and rehabilitation. She excels at assessing needs, goals, attainment, aids and equipment, minor and major adaptations, as well as vocational needs assessments and training.

One of Dora's specialties is diagnosing autism spectrum disorder (ASD). She has the knowledge and experience to work effectively with clients who have ASD. Additionally, she has a working knowledge of working with clients who have spinal injuries, which further broadens her skill set.

Dora's previous role as a senior occupational therapist in the Cardiff and Vale Community Rehabilitation Team (CRT) within the NHS provided her with valuable experience and allowed her to expand her expertise. In this role, she not only treated patients with a wide range of physical and neurological conditions but also played a part in developing the service itself. This experience has honed her skills in working with diverse clinical teams and building rapport with families and clients.

Overall, Dora is a dedicated professional who thrives on problem-solving and helping clients overcome challenges. She employs a solution-focused approach in her work and is highly proficient in case management for individuals with acquired brain injury and complex disabilities.

Dora qualified in 2000 and began her career working in Bridgend Social Services. She has considerable experience of completing full functional assessments of needs, working with families, assessing and monitoring manual handling plans, risk assessments and DFG plans. She has a demonstrated history of working collaboratively with the NHS, local authority services and care providers.
