BIOGRAPHY

Geri Bawden has over 30 years' experience of working in a healthcare setting and is a Registered Nurse Adult (1997) with a Diploma in Applied Health Studies (1997) graduating from UWE, Bristol. Geri specialises in Acquired Brain Injury and has experience in Community, Medical and Surgical nursing.

After qualifying as a nurse it was clear to Geri that the community was where her interests lay and where she wanted to support individuals to achieve their maximum potential. Geri has vast community nursing experience as both a Community Nurse within the NHS, and as a Practice Nurse in Private GP practice. Geri is passionate about supporting people in their own environment and thrives on supporting individuals to live as well and as independently as possible in their own environment despite any complex care need, illness or disability they may have.

Geri has lived experience of ABI which enables her to approach clients and their families with both empathy and understanding. Personal experience has given Geri the motivation and determination to gain the skillset which has enabled her to become a Specialist ABI Nurse. Geri has experience of working with both Adults and young children with complex care needs and works to a person-centred care set of principles, ensuring that the individual that she is supporting is at the centre of everything that she does.

In recent years Geri has been managing and supporting individuals and complex care teams in the community as a Registered Manager with CQC (Care Quality Commission). Geri has vast experience in supporting individuals with complex care needs and in case managing their support. Geri is highly skilled in recruiting, retaining and managing community teams of Registered Nurses and Carers who are responsible for supporting individuals with complex clinical needs and acquired brain injury. Geri has developed sound skills in liaising with multi-disciplinary professionals, parents/family and support teams, and is dedicated to ensuring the right team for an individual recognising that everyone is different and not one size fits all. Geri is skilled in coaching, mentoring and training teams and is passionate about healthcare education.
