JENNI SAYS:

“Integrity is a crucial value that promotes trust and ethical behaviour within an organisation. By upholding honesty, employees can maintain credibility and build strong relationships with clients, colleagues, and other stakeholders. Honesty also encourages transparency, which is essential for effective communication and collaboration.”

BIOGRAPHY

Jenni is an HCPC Registered Occupational Therapist and highly accomplished case manager with extensive experience working with adults in both unsettled and settled cases involving complex disabilities. Her background as an occupational therapist, having qualified in 2002, has provided her with a solid foundation in various specialised areas, including brain injury, orthopaedics, neurological rehabilitation, medicine, surgery, amputees, burns, and plastic surgery.

One of Jenni's key strengths lies in conducting comprehensive functional assessments for individuals with highly complex needs. These individuals often present with a wide range of difficulties and co-existing medical conditions. Jenni is skilled at evaluating their functional abilities and determining appropriate equipment and adaptations to improve their quality of life.

Furthermore, Jenni serves as an advocate, assisting individuals in obtaining benefits, services, or facilitating their return to work. She has a deep understanding of assessing care needs and making referrals for care packages and enabling support services.

In addition to her expertise in physical disabilities, Jenni possesses valuable experience in utilising various cognitive assessments and implementing cognitive rehabilitation within treatment programs. She is adept at working as a key coordinator, organising and efficiently managing services to ensure comprehensive care for her clients.

Jenni specialises in working with individuals who have experienced traumatic or acquired brain injuries, post-concussion syndrome, stroke, and other neurological conditions such as functional neurological disorder (FND) and multiple sclerosis (MS). Her work in this area has enabled her to develop a strong understanding of the current evidence base within stroke and brain injury rehabilitation.
