Case Studies:

"Liza's young client's property was not suitable for his needs, so she supported a search for alternatives. With the instructing party's approval, she engaged a property finder and assisted the process by visiting potential homes with the family. Once a suitable property was identified, Liza remained involved, advocating for the client's requirements throughout the design and planning stages. Adaptation work is now underway."

"At the outset of Liza's instruction, her client had no therapy team in place. She sourced, interviewed, and instructed a team of professionals around the child. The client now has a team comprising two physiotherapists (one delivering hydrotherapy and one providing land-based physiotherapy), an occupational therapist, and a music therapist. The child is thriving with the additional private rehabilitation, and Liza ensures smooth coordination with both the school and statutory services."

Biography:

Liza is a very highly experienced registered paediatric nurse and a case manager with a wealth of knowledge and a passion for delivering exceptional care to children and young people. With 15 plus years of experience across various settings, including her experience in paediatric wards, assessment units, and paediatric A&E demonstrating her ability to handle complex cases.

She has encountered and successfully managed a diverse range of medical conditions, particularly focusing on severe brain injuries and neurological conditions.

She has a comprehensive understanding of the various factors that impact disabled children and their families. This knowledge enables her to provide comprehensive assessments and support for children and their families. Additionally, her role as a specialist children's community nurse highlights her commitment to continuity of care and collaboration within multidisciplinary teams, ensuring holistic support for her clients.

Furthermore, her proactive approach in managing challenging behaviours, collaborating with various services like CAMHS, EWMHS, and clinical psychologists, underscores her dedication to addressing the holistic needs of the children under her care. She recognises the importance of addressing sensory needs and provides interventions to improve sensory processing in children with challenging behaviours. Her goal is to create a supportive and therapeutic environment within the home setting.

Liza's qualities of being driven, approachable, reliable, and possessing excellent communication skills undoubtedly contribute to her effectiveness as Case Manager and her ability to provide outstanding quality of care. Her continuous professional development reflects her commitment to excellence in her field.

Hobbies and Interests

I enjoy spending time with my family and socialising with friends. I love reading (Marian Keyes and Sophie Kinsella are my favourite authors)!

Testimonials

"Having seen how you have managed another of my client's cases, I think you would be a really good fit for this family and just wondered if you might have capacity for a new one"

"Liza has been working with my client for the past 9 months. During that time, she has demonstrated that she is approachable, available, and knowledgeable. Liza is incredibly committed to her clients, and concurrently supports the needs of the legal team in terms of documentation and communication. She has a friendly, positive, can-do manner and is a pleasure to work with."
