JENNIFER SAYS:

"Creativity plays a crucial role in case management. Each person you work with will have unique challenges and circumstances. By thinking outside the box, you can develop innovative solutions that address their specific needs and help them achieve their full potential."

BIOGRAPHY

Jennifer is a highly experienced professional with a background in occupational therapy and case management. Her expertise lies in working with clients who have complex conditions, including acquired brain injury, complex orthopaedic and spinal injury, as well as those with complex needs arising from medical negligence and personal injury.

In addition to her role as a case manager and mentor at WCM, Jennifer also works independently as an occupational therapist in the community. In this capacity, she provides assessment and treatment for individuals with physical, cognitive, and psychological deficits. She collaborates with various community services to ensure comprehensive care for her clients.

Jennifer's focus within rehabilitation is on neurological impairment resulting from conditions such as stroke, acquired brain injury, or central nervous system tumours. Her passion for this field is evident from her five-year tenure at the Royal Marsden Foundation Trust, where she gained extensive experience in this area.

Jennifer is professionally curious and cares passionately about understanding people, and what makes them unique, in order to provide an individualised approach to support everyone to reach their potential whatever the circumstances.

Jennifer completed her qualification as an occupational therapist in 2001. In 2004, she furthered her education by obtaining an MSc in Occupational Therapy from Cardiff University, enhancing her knowledge and skills in her chosen field. Jenny is also an Advanced Practitioner Member of BABICM.
