

Claire Christopherson

Case Manager

Claire is an experienced registered general nurse and case manager who has extensive knowledge of working with clients with complex needs.

She holds a mixed caseload of adults and children who have brain injuries, complex orthopaedic injuries as well as those with mental health conditions and amputees.

Claire's cases range from 24-hour care packages to individuals receiving minimal support; these involve multidisciplinary rehabilitation teams including occupational therapy, psychology, physiotherapy, endocrinology, vestibular physicians and the production of medical and functional reports in addition to case management.

Her career in the health profession is her passion and she feels very privileged to be able to achieve the best possible outcomes for her clients.

CMSUK Registered

Royal College of Nursing (RCN)

Experience

Claire has a wealth of experience in a wide range of clinical settings including critical care (intensive care, high dependency and coronary care), acute medical units, GP assessment, Deep Vein Thrombosis and Pulmonary Embolism clinics, nursing management, PIP assessments for the DWP and as a forensic nurse practitioner within custody settings with the Police. She has developed a particular interest in neurological practice, having worked with clients/patients with brain injuries since 2003 – working in several senior roles in hospitals in both Australia and the UK.

Claire has worked as a case manager since 2018. In this time Claire has effectively managed both adult and paediatric community rehabilitation programmes for individuals with acquired brain injury and other complex injuries.

She also worked within the district nurse team, caring for patients requiring complex wound care which included pressure ulcers for spinal patients. Her experience has afforded her exposure to working across the support spectrum of brain and complex injury, from custody settings, neuro-behavioural assessment, community preparation, supported community living and domiciliary programmes.

Claire has completed and delivered Medication Awareness training as well as being accredited to deliver the Epilepsy Awareness and Buccal Train the Trainer courses.

Whilst completing her professional training as a registered general nurse, Claire gained invaluable experience on placements within medical and surgical units including orthopaedics, operating theatres, emergency medicine, paediatrics, maternity, acute mental health, stroke and neurological teams.

Claire has gained approval as a disability analyst from the Department for Work and Pensions and has provided medical and functional assessments with comprehensive reports for individuals with physical and mental health difficulties, including acquired brain injury.
