BIOGRAPHY

Katie is an experienced nurse having worked in both private hospital settings including the Saxon Clinic and as a paediatric sister at Milton Keynes University Hospital. She is able to support clients with a range of diagnoses including Cerebral Palsy, Acquired Brain Injury and neurodegenerative disorders.

Katie has a wealth of clinical experience working as a nurse with young people and adults following acquired brain injuries, birth injuries and cerebral palsy. Katie is able to empathise with clients and their family. She understands and considers the wider implications and impact upon the family unit.

Katie is at ease interacting with people of all ages and representing their voice, wants and needs for their rehabilitation. She is excellent at advocating for clients within the educational setting and supporting the process of applying for an education and health care plan.

She has suitable knowledge of equipment and is able to identify the need for environmental adaptations and include the appropriate professionals to provide assessment and recommendations.

Katie maintains communication with her clients' instructing parties and ensures they are aware of the current needs, ongoing recommendations and funding implications.

Katie has managed her own cases as an experienced nurse. This has given her experience of working alongside multi-professional teams and liaising with health and social care professionals as well as clinical governance, safeguarding and overall safety. Katie has been responsible for discharge planning for patients which include arranging and leading multi professional meetings to ensure that the relevant therapy services are in place. She has completed referrals to and liaised with social services regarding equipment and adaptations.

Katie has experience supporting clients with care packages; this includes supporting the recruitment and continued employment of care workers and ensuring safe staffing levels at all times.

CASE MANAGEMENT SERVICES

BIOGRAPHY continued

Working in the community, Katie has experience of supporting children and young adults with a range of needs within the home from those requiring ventilation to those needing help to complete their own activities of daily living. She has hands on experience of providing care in the home for children and young people with a range of complex health needs including tracheostomy care, PEG feeds. In addition, she is experienced in the care planning process as well as the need for onward referrals and signposting in the best interests of the client.

Katie is able to work closely and effectively with families and carers to support their understanding of the clients' needs and build their own competencies with nursing care provision for example secretion management.

Due to the nature of her clinical work, Katie has experience of the importance of education or vocation in the involvement within a client's rehabilitation.
