BIOGRAPHY

Patience qualified as a Registered General Nurse in 2006. Patience extended her knowledge by studying to Master level in Health and Wellbeing at Canterbury Christ Church. Patience uses her knowledge across all boards of her working practice.

Patience had the opportunity of working in the private sector and NHS to Senior Sister level which allowed her to gain management experience. Patience gained sound clinical assessment skills and judgement in the care of complex conditions in pressure intense circumstances such as the Accident and Emergency Department.

Patience's various roles through her clinical practice allowed her to develop extensive hands-on clinical skills. Patience had the opportunity of supporting patients and families following major trauma, surgery, chronic illness and understood the importance of not only advocating for the patient but providing support and information to their families and carers to ensure their health and wellbeing was maintained.

Since 2023, Patience has been working as a Case Manager using her nursing skills to continue to assess, plan, implement and evaluate recommendations for her clients.

Patience has experience working with clients with brain injuries (acquired and traumatic), cerebral palsy, post-concussion syndrome, complete and incomplete spinal cord injury, major trauma, poly trauma, hand and upper limb injury, musculoskeletal and complex orthopaedic injury, amputees, psychological trauma, cauda equina, chronic pain, stroke, soft tissue injury, tissue viability, wound care. Patience continues to develop her knowledge in different conditions.

BROWNBILL
CASE MANAGEMENT SERVICES

BIOGRAPHY continued

Patience has experience in writing robust case management reports and is skilled through client discussions and family input to ensure that their values and strengths are reflected, and needs are met.

Patience is able to raise safeguard alerts, write rehabilitation reports, risk assessments, generate goal plans with the client and ensure that the goals are achieved. Patience is highly skilled in liaising with instructing parties, consultants, general practitioners, multidisciplinary teams, carers, family members in coordinating her client's needs. Patience ensures that holistic approach is maintained for each client and that the approach is client centred.
