

Susan Boerger

Case Manager RGN RMN

Susan has over 30 years' experience in both general and mental health nursing.

Her specialities in psychiatry lie within head and brain injury rehabilitation, acute and addictions psychiatry, and learning disability services. As a general nurse, she is a Nurse Prescriber and has developed a special interest in chronic pain management following traumatic physical and psychological trauma. Susan has experience of working in the USA as well as the UK.

Susan's expertise includes leading multidisciplinary assessments and care planning for long-term residential rehabilitation and home rehabilitation of clients with brain injuries, physical injuries and co-occurring psychiatric disorders.

Within her roles she has taken responsibility for reviewing multi-disciplinary team reports and co-ordinating specialist input, home assessments and adaptations and engaging clients and their families in the process.

Experience

Susan's work as a Senior Nurse in a Complex Care Unit, has seen her take responsibility for the assessment and care planning of potential admissions to the unit. This included clients with both acquired catastrophic physical injuries and traumatic brain injuries. She also led the complex case discharge and onward care planning group, planning and accessing resources for complex care patient discharges.

As an experienced Nurse Manager within an Acute Psychiatry and Learning Disability Unit, Susan has experience of care planning and care delivery for acute psychiatry, head injury rehabilitation and learning disability services.

Further to her UK experience, Susan's position of a Clinical Director in the US gave her added knowledge in commissioning services for care provision and financial oversight of such providers within US brain injury units.

Susan has joined JSP Ltd. as a Case Manager with recent case management and report writing experience including reporting on FND (functional neurological disorder), ABI (acquired brain injury), Brachial Plexus injury and full and partial limb amputation.
