

FRANCIS MAREE

CASE MANAGER

 MIDLANDS AND NORTH EAST

SNAPSHOT

Francis is a highly experienced Physiotherapist and has worked in community, rehabilitation and hospital settings within the NHS and private sector. She has many years of experience supporting clients and their families with complex physical, psychological and social needs. She has been a part of and has managed the multidisciplinary team involved in the rehabilitation process and is passionate about quality improvement and making sure clients receive the best possible care.

As a Case Manager, Francis has experience of working with clients with varied needs, including and not limited to amputations, traumatic and acquired brain injuries and multi-orthopaedic trauma. Through comprehensive assessments, Francis ensures each client's care plan is personal to them and aimed towards the achievement of their goals and values in life. She consistently strives towards achieving the best possible outcomes for each client.

EXPERIENCE

Francis qualified as a physiotherapist in 2006. She initially worked in a rural community setting gaining experience in all aspects of physiotherapy care including neurology, respiratory, orthopaedics, elderly care and musculoskeletal outpatients. She continued to gain experience in different aspects of physiotherapy care working in general hospital, orthopaedic and community settings. She then went on to specialise in musculoskeletal care and persistent pain management working for the NHS and in the private sector.

For the last 15 years Francis has worked as an advanced clinical practitioner gaining skills in supporting clients with complex physical, psychological and social needs within persistent pain management. She has experience working as part of multidisciplinary teams and has gained qualifications and experience in rehabilitation, prescribing medication and doing complex medication reviews and assessing clients for specialist pain interventions. In leadership roles she gained experience recruiting, leading, educating and developing clinicians from various professional backgrounds and organising and leading multidisciplinary team meetings.

Francis is passionate about making sure clients receive the best possible care, collaborative working between all parties involved and prides herself in her commitment to her clients and colleagues, attention to detail and organisational skills.

TESTIMONIAL

'Francis is a passionate and hardworking individual, highly committed to achieving the best possible outcomes for the patients/clients that she works with. She possesses vast knowledge and experience of working with individuals suffering from long-term conditions, recognising the physical, emotional and social impacts that this often has upon a person's life. Francis has shown herself to be a great communicator and leader, bringing together groups of clinicians to work collaboratively to achieve excellence and innovation.'
