

VINAY GEMAWAT

Snapshot

Highly experienced physiotherapist with more than two decades of clinical experience with a strong skill set for undertaking high quality holistic assessments, developing care & rehabilitation plans, and coordinating multi- disciplinary and support teams to achieve outcomes.

Experience

I am a highly experienced Physiotherapist with a diverse clinical background spanning inpatient, outpatient, and community settings within both the NHS and private sector. I am a dynamic professional with strong problem-solving abilities and excel in collaborating with multidisciplinary teams. Early in my career, I adopted a holistic approach to spinal rehabilitation while working in Neurorehabilitation and brain injury department at Bombay Hospital, in India. My role involved supporting patients recovering from Acquired brain and spinal cord injury facilitating complex discharges as part of a multidisciplinary team. This included prescribing care packages, liaising with patients and families, and empowering individuals to regain independence in their home settings.

I later decided to move to UK in 2007 to pursue my Masters In Applied Physiotherapy (Neurology) from Sheffield Hallam University and completed my MSc degree successfully in September 2008. This strengthened my expertise in conducting comprehensive patient assessments and delivering personalised rehabilitation plans.

To further expand my expertise. I gained extensive experience in CATS (clinical assessment and treatment service) managing neuromusculoskeletal patients with complex needs and long term pain management in various NHS and private settings. During this period, I have also gained various secondary qualifications to facilitate my clinical journey including 'Certificate in Joint Injection' which enabled me to work at advanced Physiotherapist level Band8A. I have special interest in developing pathways and service development for newly established services and regularly mentoring physiotherapy and medical students under my care.

I am also working as a First Contact Physiotherapist within NHS setting, alongside GPs and other health professionals, providing assessment and diagnostic skills in ensuring patients are signposted effectively and efficiently.

Alongside my employed role, I have been successfully running my own Physiotherapy business since 2012. In this capacity, my broad experience across various settings has provided me with the knowledge and skills to make informed decisions and create meaningful outcomes for my clients. Above all, I am compassionate, holistic, highly organised, and committed to clear communication—qualities that are integral to my role as a Case Manager.
