Testimonials

"The client and family spoke very highly of Marian's involvement and it was evident that the rehabilitation recommendations had already been comprehensively explored during her earlier assessment."

— Claimant Solicitor

"I can't thank you enough for your support and assistance throughout this process."

— Client

Case Studies:

Marian supports an 18yr old client with brain and orthopaedic injuries, following a RTA. She has arranged her rehabilitation and coordinated the MDT to ensure the plan progresses in the clients best interest. This has included physio, OT and psychiatric assessment as well as supporting her to resume her A levels to fulfil her ambition in university.

Marian implemented and coordinated the care for a woman with complex needs following a brain injury, who had carers 24/7. She ensured the care plans met her clinical and social needs care plans e.g. diabetes management, community integration, including management of her dog and ensuring her spiritual needs were met.

Biography:

Marian is a very highly experienced nurse and case manager with a wealth of knowledge acquired in NHS and private settings over 20+ years. She has a passion for the delivery of exceptional care supporting children, adults and older people with complex health needs, neuro-disability, brain injury, physical disability and mental health conditions.

As a Clinical Lead for a specialist care provider she collaborated with private case managers to deliver coordinated, high-quality care in complex and safeguarding sensitive cases. She transitioned to the case manager role and gained further expertise in complex and medico-legal case management. She is a skilled assessor, conducting comprehensive clinical, functional and psychosocial assessments to inform individualised care and rehabilitation plans. Working with multi-disciplinary teams to pull together the required rehabilitation for her clients. She has exceptional communication and negotiation skills and has experience of recruitment and management employment-related matters.

Marian produces high quality professional reports following assessment and at regular intervals to update stakeholders. She ensures her reports are evidence based clinical reports that are suitable for medico-legal scrutiny.

Marian is experienced in clinical leadership and governance, which is essential for working with case management clients that come under Care Quality Commission (CQC) regulation for care and treatment of disease, disorder or injury (TDDI).

Hobbies and Interests

She enjoys walking her dogs, playing the piano and watching films.

Marian also speaks Welsh.
